Abstract. This article examines how the COVID-19 pandemic has driven policy innovation across various sectors. It highlights the adaptive strategies employed by governments to manage the crisis and the long-term implications for public policy. By analyzing case studies from different countries, the research sheds light on the innovative approaches adopted in healthcare, economic relief, and social welfare. The findings underscore the importance of flexibility and resilience in policy-making, providing valuable lessons for future crises.

Keywords: pandemic, innovation, policy, healthcare, crisis

Introduction: The COVID-19 pandemic has posed unprecedented challenges to governments worldwide, necessitating swift and innovative policy responses to mitigate the crisis's impact. This study explores the role of policy innovation during the pandemic, focusing on the strategies adopted by governments to address the multifaceted challenges posed by the virus. By analyzing case studies from diverse geopolitical contexts, this paper identifies key patterns in policy adaptation and innovation, particularly in healthcare systems, economic relief measures, and social welfare programs. The research aims to provide a deeper understanding of how crises can catalyze policy change and the factors that contribute to successful innovation. Ultimately, this work seeks to equip policymakers with insights to enhance their preparedness and responsiveness in future emergencies. [This is a preliminary version.
