Abstract. This article explores the effects of urbanization on social structures and community interactions. As urban areas continue to grow, traditional social networks are disrupted, leading to changes in social relationships and community dynamics. Using comparative analysis of urban and rural settings, the study highlights the transformation of social norms and the emergence of new social challenges in urban environments.

Keywords: Urbanization, Social Structures, Community Dynamics, Social Norms, Urban Challenges

Introduction

Urbanization has become a defining feature of modern society, influencing various aspects of social life. This article investigates how urbanization reshapes social structures, focusing on the transformation of community interactions and social norms. By comparing urban and rural settings, we examine the changes in social relationships and the emergence of social challenges unique to urban areas. The study provides insights into the adaptive mechanisms communities develop in response to urban growth, including the formation of new social networks and support systems.
